28 August 1989

Dear Mr Wadlington,

The Organizing Committee on behalf of the Government of Cameroon and the World Health Organization is pleased to invite you to participate in the Second International Symposium on AIDS Information and Education to be held in Yaoundé, Cameroon from 22 to 26 October 1989.

Please note, however, that this invitation does not imply any financial responsibility for the Organizing Committee, the Government of Cameroon or the World Health Organization.

We remind you of the need for yellow fever vaccination for entry into the Republic of Cameroon. This is normally required for visa purposes, however, for individuals, concerned that the yellow fever vaccine might be harmful to them, we suggest that they consult with their physician.

If the physician concurs, the physician should write a statement declaring that the yellow fever vaccine was not administered because of medical contra-indications. This statement should be written on the vaccine card or attached to the relevant section of it.

Yours sincerely,

Samuel Ozi Rando

for

Professor Lazare Kaptue
Chairman
Organizing Committee
