Philadelphia, PA 19102

Dear Curtis,

Thank you very much for agreeing to participate in our summer class on community health for medical, nursing, and social work students. We have taught this course for the last three years with wonderful response from the students who have elected to take it. In the course we try to highlight important background issues and then focus on new, current issues in community health.

We have enclosed for your reference a copy of this year's course outline. The session in which we are asking you to participate is "Peer Counseling and HIV Infection." The course is very informal. In a typical session, two presenters will each discuss one aspect of the topic, followed by questions and answers by the students.

We do not generally ask the presenters to prepare formal remarks, although there may be reading material that you would like the students to have reviewed before your session. In addition, presenters sometimes like to speak to each other before the class. We would be happy to give you information on contacting your co-presenter if you do not know them.

Feel free to contact us at 590-2195 if you have any questions. We will look forward to seeing you on **Tuesday, August 20, 1991 at 4:00 p.m. in Room 313 of the Nursing Education Building at Penn** (map enclosed).

Sincerely,

Donald F. Schwarz, MD

Anthony L. Rostain, MD
